

INTELLECTUAL PROPERTY ASSIGNMENT AGREEMENT

This Intellectual Property Assignment Agreement (the "Agreement") is entered into as of July 11, 2026 (the "Effective Date"), by and between:

Zachary Roberts, an individual residing in the State of West Virginia ("Assignor"),

and

Arcana Veritas LLC, a West Virginia limited liability company ("Assignee"), located at 74 Quebec Ct, Falling Waters, WV 25419 (each a "Party" and together the "Parties").

RECITALS

WHEREAS, Assignor is the sole owner of certain intellectual property, including but not limited to software applications, source code, tools, designs, trademarks, copyrights, trade secrets, and related materials described herein;

WHEREAS, Assignor is the sole member and founder of Assignee and desires to contribute and transfer all right, title, and interest in such intellectual property to Assignee as a capital contribution in exchange for membership interest in Assignee;

WHEREAS, Assignee desires to accept such contribution and transfer, and to own and control the Assigned IP (as defined below) for its business purposes;

NOW, THEREFORE, in consideration of the mutual covenants set forth herein, and other good and valuable consideration described in Section 2, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows:

1. Assignment

Assignor hereby irrevocably assigns, transfers, conveys, and delivers to Assignee all right, title, and interest, worldwide and in perpetuity, in and to the following intellectual property (collectively, the "Assigned IP"), including all associated patents, copyrights, trademarks, trade secrets, moral rights (to the extent transferable or waivable), source code, object code, documentation, designs, and any registrations or applications therefor:

- No Ducking Way — the Android application, together with all related source code, assets, artwork, and documentation;
- Grok Link — the developer tool, together with all related source code, assets, and documentation;
- Claim Clash, together with all related source code, assets, and documentation;
- Any and all other software, applications, tools, documentation, designs, trademarks, copyrights, trade secrets, and intellectual property owned or controlled by Assignor as of the Effective Date and used in or related to Assignee's business.

This assignment includes the right to sue for, and collect and retain damages for, past, present, and future infringement or misappropriation of the Assigned IP.

2. Consideration

As consideration for this assignment, Assignee shall record the Assigned IP as a capital contribution by Assignor, and Assignor's membership interest in Assignee shall reflect such contribution in accordance with Assignee's operating agreement and capitalization records. Assignor acknowledges that the tax treatment of this contribution should be reviewed with a qualified tax advisor or accountant.

3. Representations and Warranties of Assignor

Assignor represents and warrants to Assignee that:

- Assignor is the sole and exclusive owner of all right, title, and interest in and to the Assigned IP, free and clear of any liens, licenses, security interests, or other encumbrances, except as disclosed in writing to Assignee prior to the Effective Date;
- Assignor has not previously assigned, transferred, licensed, or otherwise encumbered any of the Assigned IP in a manner inconsistent with this Agreement;
- to Assignor's knowledge, the Assigned IP does not infringe, misappropriate, or violate the intellectual property rights of any third party;
- Assignor has full right and authority to enter into this Agreement and to make the assignment contemplated herein; and
- any third-party software, open-source components, or AI-assisted tools used in creating the Assigned IP were used in compliance with their applicable licenses and terms of service, and such use does not restrict Assignee's ownership or use of the Assigned IP as contemplated by this Agreement.

4. Operational Transfer

Promptly following the Effective Date, Assignor shall reasonably cooperate with Assignee to transfer operational control of the Assigned IP, including, without limitation, any associated developer accounts (e.g., Google Play Console, Apple Developer Program), app store listings, source code repositories, domain names, third-party service accounts, and revenue or payout accounts, to Assignee or to an account designated and controlled by Assignee.

5. Future Intellectual Property

Assignor agrees that any intellectual property Assignor creates, develops, or acquires in connection with Assignee's business after the Effective Date shall, to the fullest extent permitted by law, be deemed a work made for hire owned by Assignee and, to the extent any such intellectual property is not deemed a work made for hire, Assignor hereby assigns all right, title, and interest in such intellectual property to Assignee upon its creation, without need for further documentation, subject to Section 6 (Further Assurances).

6. Further Assurances

Assignor agrees to execute any additional documents, and to take any further actions reasonably requested by Assignee, at Assignee's expense, to perfect, record, or enforce Assignee's rights in the Assigned IP, including filings with the United States Patent and Trademark Office, United States Copyright Office, or any applicable foreign authority.

7. Indemnification

Assignor shall indemnify and hold harmless Assignee from any third-party claims, losses, or expenses (including reasonable attorneys' fees) arising out of a material breach of Assignor's representations and warranties in Section 3, except to the extent such claims arise from Assignee's own acts after the Effective Date.

8. Miscellaneous

- Entire Agreement. This Agreement constitutes the entire agreement between the Parties regarding the Assigned IP and supersedes all prior agreements or understandings, written or oral, relating to its subject matter.
- Amendment. This Agreement may be amended only by a written instrument signed by both Parties.
- Severability. If any provision of this Agreement is held invalid or unenforceable, the remaining provisions shall continue in full force and effect.
- Governing Law. This Agreement shall be governed by, and construed in accordance with, the laws of the State of West Virginia, without regard to its conflict-of-laws principles.
- Counterparts. This Agreement may be executed in counterparts, including electronically, each of which shall be deemed an original.
